Dear Parent/Guardian,

Date: 26/03/19

Your child is about to begin his/her science fair project! It should be a fun learning opportunity for your child. This guide may be helpful during the next several weeks. Please remember:

- As a parent, your job is only to assist. This is an opportunity for your child to think and act like a scientist, and to create and discover his or her very own science project!
- Please allow your child plenty of time to make mistakes. He/she might even need to start the experiment again. Remember, real scientists constantly redo their studies by starting over again. [L] [SEP]
- For safety reasons, please be available to assist your child with research and any portions of the experiment that may pose a safety risk. [L] [SEP]
- Please make time to visit the public library and use the Internet to assist your child with project research. [L] [SEP]
- It is recommended that you purchase the display board as soon as possible. Most craft stores, office supply stores, and superstores carry display boards for science fair projects. [L] [SEP]
- Remember, this is a multipart project. Your child must complete the science journal, research paper, display board, and presentation in order to receive full credit. [L] [SEP]

Thank you for your continued support!

[L] [SEP]

----- CUT AND RETURN -----

My child and I have read the Science Fair Student Guide in its entirety. We understand it is to be completed **at home**, know when each section is due and that the **project display board must be completed, brought and presented** to the school by Thursday April 4th.
